- Harmonize your Quality Center Projects and easily get:
 - Cross Project Reporting
 - Simplified Multi-Project integrations
 - Copying and Sharing Assets (test cases, requirements etc.) between projects
 - Easy implementation and deployment of common test practices and customizations

HP Software
Interoperability 

THE CHALLENGE

QC projects are often customized to suit different testing needs and testing processes. However, this benefit and flexibility can easily become a challenge.

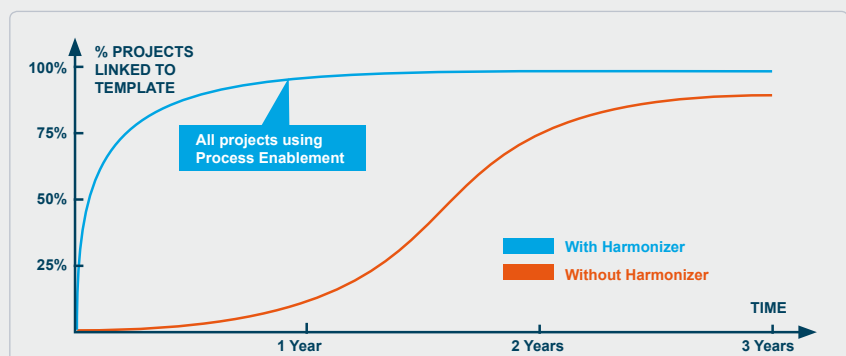

Each QC project has its own Database and since QC projects can be customized independently of each other - it will often lead to the situation where projects have different structures in the database. Solving this problem requires deep technical know-how and expertise.

THE SOLUTION

Assure Project Harmonizer is a turnkey solution that will convert your existing HP Quality Center projects to the structure of your QC Project Template.

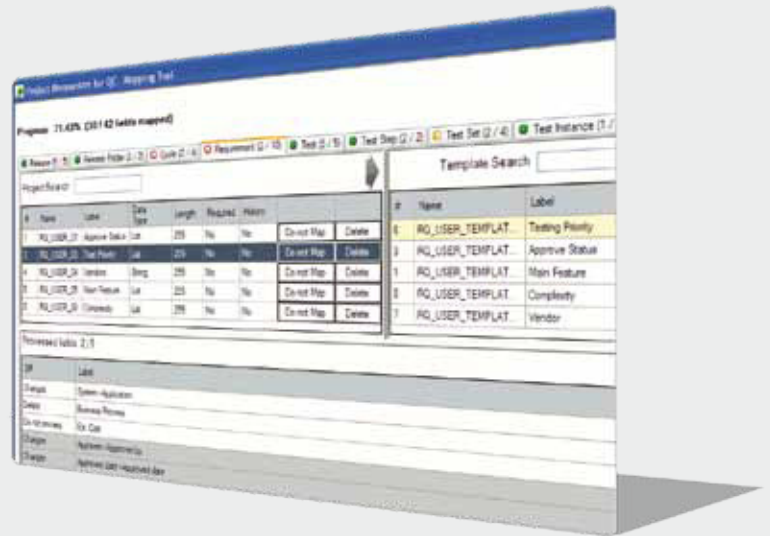

Assure Project Harmonizer is an intuitive and easy to use product and guides you through the different stages of the complex process of project harmonization.

UNLEASH QUALITY CENTER

How it Works

- Create a Project Template in QC
- Use the Template Documentation Tool to document the Template's fields
- Project owners map their projects' fields to the template fields using the Mapping Tool
- Use the Project Conversion Tool to convert the mapped projects to be compatible with the Template

Key Features:

Safely convert project fields of all QC entities and conserve their integrity:

- Field Data
- Group Permissions
- History Data
- Favorites
- Graphs
- Reports

Based on Proven Methodology and Best Practices

Assure Project Harmonizer was designed and created based on our experience gained with previous harmonization projects. Using our technology, our clients have harmonized thousands of QC projects successfully.

A solution for Cross-Project-Customization issues

Assure Project Harmonizer will convert your projects so QC's Cross-Project Customization feature can be used out of the box without conflicts.

Reduce Risk & Govern the Harmonization Process

Assure provides you with the know-how. We make sure you will be on track and in control of your harmonization process and avoid the pitfalls of such a technically challenging project.

Delegate tasks to your Project Owners

Let your project owners map their projects' fields to the template's fields.

Save Valuable Time

Assure Project Harmonizer was designed to be efficient and to deliver fast results:

- Speed up mappings with AutoMap and AutoSuggest
- The tool guides you through the process of harmonization
- Reuse mapping across projects
- Fast & optimized project conversion minimizes downtime
- Intuitive and Easy to Use UI

Based on our past experience, we estimated the standardization project would take us 6-8 months. Using Assure's Harmonizer it took us only one month.
